## COMPETITIVE ADVANTAGES

### MADE IN THE USA

Unlike some competitors who claim "Made in the USA" but only assemble in the States, our bulbs are created start to finish in our headquarters in Eastlake, OH, on our high-speed Automated Robotic SMT assembly line.

### FOCUS ON DESIGN

Our durable constructed lights don't use internal transformers and have the most energy-efficient patent-pending LED drive circuitry in the industry.

### LONGEST WARRANTY

Our bulbs are backed by a solid 21-year warranty, providing guaranteed security on your investment.

### COMPETITIVE PRICES

Our patent-pending technology lowers manufacturing costs by eliminating many electronic components used in traditional LED power supplies.

### FINANCING & REBATES

Our products are eligible for financing and qualify for regional and national rebates and tax incentives, providing immediate cost savings.

## What does US Lighting Group do?

We manufacture a new and innovative brand of LED lighting that is much more energy efficient than other LED lights on the market. Our products are made for use in commercial buildings. Unlike other manufacturers, our lights are guaranteed for 21 years.

### Benefits of LED Lighting:

- Immediate reduction in lighting bill up to 70%
- No yearly bulb and ballast replacements
- Long lifespan, over 30 years of operation
- Ecologically friendly and recyclable: No mercury or hazardous chemicals to dispose!
- Durable and rugged, resistant to external impacts
- Virtually no heat and UV emissions

### Applications for LED light bulbs:

- |                 |              |               |
|-----------------|--------------|---------------|
| • Board Rooms   | • Stores     | • Hospitals   |
| • Office Spaces | • Gymnasiums | • Warehouses  |
| • Factories     | • Schools    | • Greenhouses |
